RESULTS PRESENTATION

Q1 2024

Q1 2024 IN FOCUS

STRATEGIC SUMMARY – Q1 2024

- The global aviation industry continues to face economic and geo-political uncertainty that are impacting the trading environment across a number of markets.
- The aviation industry prolonged supply chain challenges continued in Q1 impacting costs related to engines, spare part costs, staffing and other areas which resulted in higher inflationary costs across the business.
- Air Arabia's Q1 financial and operational performance reflects the group's ability to constantly deliver solid performance while navigating through economic challenges.
- The first quarter net profit achieved was driven by robust passenger demand and revenue growth of 13% and 8% respectively while carrying over 4.4 million passenger at a high average seat load factor of 85%.
- The Q1 2024 net profit of AED 266 million was 22% lower than the record high Q1 2023 , driven by the seasonality shift during the month of Ramadan, higher fuel price, currency fluctuations in key markets, and ongoing supply chain challenges that costed the business more.
- Focus on growth continued in Q1 and Air Arabia added 2 new routes to its global network from its operating hubs in the UAE, Morocco, Egypt and Pakistan.

ESG matters are important consideration in how we do business, including our corporate governance systems that runs at every level in the organization, risk management and methodology to serve customers and support for local communities. Our main driver is the sustainability and efficiency embedded in the culture and management of the airline. Equally important, we believe that the core items that are critical of our ESG approach are practiced across the organization through efficient operations and environment friendly practices. For Air Arabia, this means we are leveraging our business and policy expertise, and presence to help drive an inclusive recovery, expand, and accelerate sustainability. Please review Air Arabia’s ESG report for more information.
